Aspiring developer with a proactive mindset and a keen interest in coding. Proficient in Javascript, Python, and React, eager to learn and grow in a dynamic environment while contributing to the success of projects.

TECHNICAL SKILLS

- **Programming Language :** JavaScript, Python, C
- **Web Technologies :** HTML5, CSS3, Bootstrap5, React
- **Database:** MySQL
- **Dev Tools :** VsCode, PyCharm, Git, Github

PROJECTS

Project Title: iMovies

Tech Stack: HTML, CSS, JAVASCRIPT

- Developed a dynamic web application that fetches data from a JSON file using Ajax and displays movie information in card format on the screen.
- Implemented a filtering mechanism allowing users to filter movies by category using filter buttons.
- Introduced a user preference form, allowing users to specify their movie preferences. As a result, it enhanced the user experience by providing personalized movie recommendations to users.

Project Title: Google Keep Note Clone

Tech Stack: HTML, CSS, JAVASCRIPT

- Created a web application inspired by Google Keep, replicating its user interface and core functionalities.
- Incorporated key features of Google Keep, such as creating, editing, and deleting notes.
- Utilized local storage for data persistence, ensuring that users' notes are automatically saved within their browser for easy access.
